LINUX ADMINISTRATION | SOC ANALYST | NETWORK ENGINEERING

PENDIDIKAN

- TK Darus Saada (2014 - 2015)
- SDN 01 Pasirmuncang (2015 - 2021)
- SMPN 1 Caringin (2021 - 2024)
- SMKS Wikrama Bogor (2024 - 2027)

SKILLS

- Linux Administration (Debian/Ubuntu), Apache2, Nginx, SSH, DNS, DHCP
- MySQL, MariaDB, phpMyAdmin
- Firewall UFW, Backup & Restore
- Prometheus, Grafana, Zabbix
- Stellar Cyber Open XDR, FortiGate, OPNsense, Suricata
- Threat Detection, Log Analysis, Incident Response
- TCP/IP, Routing, Switching, VLAN, Subnetting VLSM
- MikroTik, Cisco Networking
- AWS (EC2, Auto Scaling, RDS, S3)
- Docker, Git, Bash Scripting

SERTIFIKASI

- Stellar Cyber SOC Analyst Associate
- Linux System Administrator
- Ethical Hacker
- AWS Cloud Practitioner
- FortiGate 7.6 Operator
- CCNA Network Fundamentals
- Linux Professional Certificate
- Cyber Security Operations Simulation
- Linux Unhatched
- Introduction to Cybersecurity

PROFILE

Siswa SMK Wikrama Bogor jurusan Teknik Jaringan Komputer dan Telekomunikasi (TJKT) yang memiliki minat dan kompetensi dalam administrasi sistem Linux, jaringan komputer, cloud computing, dan keamanan infrastruktur. Berpengalaman dalam melakukan instalasi, konfigurasi, monitoring, dan troubleshooting server berbasis Linux serta implementasi jaringan menggunakan MikroTik dan Cisco. Memiliki kemampuan dalam membangun layanan server, monitoring infrastruktur, dan mengelola keamanan jaringan menggunakan berbagai teknologi modern.

KEAHLIAN

LINUX ADMINISTRATION & INFRASTRUCTURE

Linux Administration, Apache2, Nginx, SSH Management, SSH Key Authentication, Linux Package Management (APT), DNS & DHCP Administration, Firewall Management (UFW), Virtual Machine Management, Backup Management, System Log Analysis, Web Server Configuration, System Troubleshooting.

Monitoring & Security

Prometheus, Grafana, Zabbix, Infrastructure Monitoring, Alert Management, Log Analysis, Stellar Cyber Open XDR, FortiGate Firewall, OPNsense Firewall, Suricata IDS/IPS, Threat Detection & Incident Analysis.

Network Engineering

TCP/IP Networking, Routing & Switching, VLAN Configuration, Subnetting & VLSM, MikroTik Administration, Cisco Networking, Network Troubleshooting, Network Documentation.

PROJECT

Enterprise Network, Security & Cloud Infrastructure

Merancang dan mengimplementasikan infrastruktur perusahaan end-to-end menggunakan MikroTik, Cisco, AWS Cloud, dan Linux Server. Menerapkan VLAN, Routing, DHCP, DNS, Firewall, Hotspot Management, Bandwidth Management, Nginx Web Server, MariaDB Database, WordPress Deployment, SSH Hardening, serta integrasi layanan cloud berbasis AWS EC2 untuk mendukung operasional dan keamanan infrastruktur.

AI-Based Network Anomaly Detection & Security Monitoring

Mengembangkan sistem deteksi anomali jaringan berbasis Artificial Intelligence untuk mengidentifikasi aktivitas mencurigakan secara otomatis. Mengintegrasikan analisis trafik jaringan, visualisasi data, monitoring keamanan, serta investigasi aktivitas jaringan yang berpotensi menjadi ancaman keamanan.

Infrastructure Monitoring & Security Operations Center (SOC)

Membangun sistem monitoring dan alerting menggunakan Prometheus, Grafana, Zabbix, Stellar Cyber Open XDR, serta OPNsense Firewall dan Suricata IDS/IPS untuk meningkatkan visibilitas, monitoring performa, dan keamanan infrastruktur secara real-time.

Enterprise Employee Management System

Mengembangkan aplikasi manajemen karyawan berbasis Django dengan fitur Role-Based Access Control (RBAC), manajemen data karyawan, departemen, jabatan, autentikasi pengguna, serta dashboard administrasi terpusat.
